

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method of subscription to a service in respect of a processing of an input program comprising at least one particular event, said method comprising the steps of, implemented by a service provider:

5 | generating an information signal ~~containing~~ consisting essentially of control information and an input program comprising at least one particular event;

transmitting said information signal to each user;

10 | offering various subscriptions to a user who is to make a choice of subscription and who is furnished with a device

comprising means ~~of selection~~ for selecting the particular event which can be configured on the basis of the chosen subscription ~~providing, said means of selection~~ for selecting operating on the input program comprising at least one particular event to

15 | selectively provide an output program comprising or not comprising the particular event according to the chosen subscription in dependence on said control information; and

20 | validating the user's choice of subscription which triggers a step of configuring said means ~~of selection~~ for selecting.

2. (Currently Amended) The method of subscription to a service as claimed in claim 1, wherein the control information includes a

table of events, the means ~~of selection~~for selecting being suitable  
for selecting a particular event on the basis of an event status  
5 value in the table.

3. (Currently Amended) The method of subscription to a service  
as claimed in claim 1, wherein said device comprises means ~~of~~for  
accelerated reading of a recorded program; and means ~~of~~  
~~deactivation~~ for deactivating said accelerated reading means during  
5 the particular event in respect of a specified subscription in  
dependence on said control information.

4. (Original) The method of subscription to a service as  
claimed in claim 1, wherein the particular event contains at least  
one advertisement.

5. (Original) The method of subscription to a service as  
claimed in claim 1, wherein the choice of the subscription is made  
by selecting one subscription from among several subscriptions  
offered on a graphics interface linked to said device.

6. (Currently Amended) The method of subscription to a service  
as claimed in claim 1, wherein said validating step is implemented  
by the service provider by sending said device a signal  
characteristic of the chosen subscription, said signal being  
5 suitable for configuring said means ~~of selection~~for selecting as a  
function of the chosen subscription.

7. (Currently Amended) A device for receiving an information  
signal ~~including~~ consisting essentially of control information and  
an input program having at least one particular event, said device  
comprising means ~~of selection~~ for selecting the particular event  
5 configurable by a provider of the information signal on the basis  
of a subscription chosen by a user, said ~~selection~~ selecting means,  
operating on said input program having at least one particular  
event, to selectively provide an output program comprising or not  
comprising the particular event according to the subscription  
10 chosen by the user in dependence on the control information.

8. (Currently Amended) A device for receiving an information  
signal ~~including~~ consisting essentially of control information and  
an input program having at least one particular event, said device  
comprising means ~~of selection~~ for selecting the particular event  
5 configurable by a provider of the information signal on the basis  
of a subscription chosen by a user, said ~~selection~~ selecting means  
operating on said input program having at least one particular  
event in order to store on a medium an output program comprising or  
not comprising the particular event according to the subscription  
10 chosen by the user in dependence on the control information.
